ELECTRIC POWER IMPROVEMENTS

NEW POWER FACILITIES IN MONTENEGRO -- Politika, No 13248, 27 May 49

A new electric power plant has just been put into operation at Kotor in Montenegro. Work has begun on a long-distance power line from Kotor to Ulcinj, and the first 20 kilometers of this line will be in service within a few days. Work is now in progress on the section of the line between Budva and Ulcinj. Poles have been distributed along the entire route, and they will be set up within a few days. Transformer stations will be built at the same time.

The manpower shortage that hindered early operations has for the most part been overcome.

NEW POWER COURCE IN BOSNIAN MINE -- Politika, No 13245, 23 May 49

Prijedor -- A new mine turbine has just been installed in the electric power section of the Ljubija mino in Bosnia, 15 days shead of schedule.

In the past the mine has not had sufficient electric power. This has made mechanization difficult, and sufficient quantities of compressed air have not been available for mine operations. The new turbine will correct these conditions, supply Prijedor with more power, and make the electrification of neighboring villages possible.
